

# Community Gardens Toolkit

### **OVERVIEW**

### **Defining Community Gardens**

According to information contained in the Full Gardens organizations website (<a href="www.fullgardens.com">www.fullgardens.com</a>), a community garden is a piece of land gardened by a group of people. Community gardens provide access to fresh produce and plants as well as to satisfying labor, neighborhood improvement, a sense of community, and connection to the environment. They are publicly-functioning in terms of ownership, access and management, as well as typically owned in trust by local governments or nonprofits.

A city's community gardens can be as diverse as its communities of gardeners. Some choose to solely grow flowers, others are nurtured communally and their bounty shared, some have individual plots for personal use, while others are equipped with raised beds for disabled gardeners.

Community gardens encourage an urban community's food security, allowing people to grow their own food or to donate what they have grown. The gardens also combat two issues that plague modern urban life, by bringing gardeners closer in touch with a sustainable source for food, and by creating a social community by reducing isolation. Active communities have been shown to experience less crime and vandalism.

Houston's Urban Harvest supports more than 100 community gardens in the Houston area. Its website, found at <a href="http://www.urbanharvest.org/cgardens/types.html">http://www.urbanharvest.org/cgardens/types.html</a>, lists the following types of gardens:

- 1. Donation gardens where crops are grown and the produce is donated to local food pantries.
- 2. School gardens provide a hands-on learning laboratory for school children.

- 3. Neighborhood or allotment gardens are found in neighborhood parks and vacant lots.
- 4. Therapy gardens provide an opportunity for physical, emotional and spiritual health and healing.
- Market gardens provide a source of income for low-income residents as well as entrepreneurs, who sell their produce to local individuals, restaurants, retailers and farmers markets.

**NOTE:** With allotment gardens residents typically rent their portion of a community garden, while community residents share equally in the labor and in harvests in neighborhood gardens.

### The HDHHS Community Gardens Program

The Houston Department of Health and Human Services has developed a network of community gardens. The community gardens program grew out of its efforts to teach people the importance of nutrition proper and exercise in preventing and managing chronic disease.

In 2009, Hurricane Ike recovery funding allowed HDHHS to initiate its first

gardens with funding to teach proper nutrition as well as to create gardens as 'demonstration labs'. Participants were able to share in harvested crops as well as use knowledge gained in growing their own vegetables.

With the knowledge of proper gardening community members are able to plant and harvest their own crops. Vegetables can be grown in raised beds, in the ground or in containers. HDHHS gardens are made up of either one or two-tiered raised-beds. The program has been designed to accomplish some specific goals, including:

- 1. Promote healthy eating to reduce obesity and the effects of chronic disease
- 2. Promote physical activity through gardening to improve cardio vascular function
- 3. Promote the importance of socialization in overall wellness
- 4. Teach the fundamentals of gardening
- 5. Cultivate partnerships to promote community and personal gardening

### **Growing with HDHHS Community Gardens**

The program has expanded from its first community garden at the Southwest Multi-Service Center to 11 gardens throughout the city. Those gardens host garden clubs that are open to anyone willing to join and actively participate preparing in planting beds. crops, watering, maintaining and harvesting.

The benefits of garden club membership include:

- A. Learning how to prepare, plant and tend a vegetable garden;
- B. Having an opportunity to exercise through walking and pruning the garden;
- C. Getting to meet new people thereby expanding their social network; and
- D. Sharing in the crops that are harvested.

People interested in joining an HDHHS Garden Club may do so by calling or visiting the contact listed for the multi-service center community garden of their choice. Members must abide by the Garden Club rules found at the end of this section.

### **HDHHS Garden Locations**

### Fifth Ward

The Peavy Center Community Garden is maintained primarily by 5<sup>th</sup> Ward area seniors, participants in the NCI Senior Program and community youth including the 5th Ward Enrichment Program, 5<sup>th</sup> Ward Head Start Program, Yes Prep Academy and Southwest Key. The garden has six raised beds. In June 2012, the Peavy Community Garden received the Community Partnership Award. Volunteers are always needed and welcome.

Location	Address	Contact	Phone
5th Ward/ Peavy Center	3814 Market St.	Rhonda Thomas	832-393-3803

### Kashmere Gardens

The Kashmere Community Garden has provided gardening and socialization opportunities Kashmere Gardens since 2010. The garden promotes а sense sustainability by fostering involvement community and teaching community members to grow their own vegetables and herbs. The garden has six beds and is maintained by community

members, NCI Kashmere seniors, and the Community Re-Entry Network.

Location	Address	Contact	Phone	
Kashmere MSC	4802 Lockwood Dr.	Lakeisha West	832-393-5503	

### **Northeast**

The Northeast Community provided Garden has gardening organic opportunities since 2010. With six raised beds, the garden is easily accessible for people who mobility impaired. are members Club responsible for watering, maintaining and sharing in garden's harvests. Additional members are needed to assist with the up-keep of the garden and share in the harvests.

Location	Address	Contact	Phone
Northeast MSC	9720 Spaulding.	Sharisa Daniel	713-449-7933

### **Denver Harbor**

With six raised beds, the Denver Harbor Community Garden has been a source for fresh produce and social interaction for the east end community since 2010. Community garden club members assist in maintaining the garden and share in weeding, watering and harvesting produce from it. Harvested crops have included collard and mustard greens, broccoli, lettuce and tomatoes. While there is a dedicated group of that tend the garden, more are needed.

Location	Address	Contact	Phone	
Denver Harbor MSC	6402 Market	Jesse Rodriguez	713-670-2144	

### Park Place

The garden at Park Place has been in existence since 2010. Gardeners planted have and harvested mustard greens, eggplants, and various species of tomatoes, peppers, cabbage, fragrant mints, herbs, broccoli and cauliflower. Volunteers currently involved in weeding watering, and harvesting are fostering a new bond between the community and its health department. Please call for more information or to

join our club.

Location	Address	Contact	Phone
Park Place	7611 Park Place	Daisy James	832-393-5637

### Sunnyside

The Sunnyside Community Garden is the largest of the **HDHHS** gardens. It has 10 raised beds, fruit trees and large planters. Seniors from the YWCA Program, community volunteers and

Harris County Juvenile Probation clients help with upkeep and maintenance of the garden. Harvested fruits and vegetables are distributed among garden club members. If you are interested in joining our club, please call for more details.

Location	Address	Contact	Phone
Sunnyside MSC	4605 Wilmington St.	Carol McClung	713 527-4036

### **Third Ward**

The Third Ward community garden began as a fountain four flower beds and included in the original multiservice center design. Ultimately, the fountain was disconnected, the beds were cleaned out and new soil was brought in to establish a garden. Seniors attending the center's senior program embraced the garden and have been instrumental in its growth. Please give us a call

if you are interested in joining our club.

Location	Address	Contact	Phone
Third Ward MSC	3611 Ennis St.	Britney Scott	713-527-4041

### Hiram Clarke

The Hiram Clarke Community Garden was established in 2010. It has four beds, one of which is dedicated as a children's bed. The NCI Head-Start program partners with other gardeners to get the children involved. Volunteers have brought their own fruit trees to plant and beautify the garden. collaborative This has helped to empower community residents and strengthen community pride in the Hiram Clarke

community. Please call us if you are interested in joining the club.

Location	Address	Contact	Phone	
Hiram Clarke MSC	3610 West Fuqua St.	Monica Franklin	832-393-3803	

### North Stadium

The North Stadium Community Garden was established 2010 to serve as а teaching/training garden for **HDHHS** other community gardens. It has seven beds and ample space for traditional garden crops as well as experimental soils and vegetable/herb varieties. garden is easily accessible for people who are mobility impaired. The garden is tended by 10 HDHHS volunteers. Garden club members are always needed to assist with planting, watering, weeding. harvesting, and general area

cleanup.

Location	Address	Contact	Phone
North Stadium	8000 N. Stadium Dr	Roy Villarreal	832-393-4869

### Southwest

The Southwest Multi-Service Center Community Garden was established in 2009. It was the first health department community garden to be built. The garden has six beds and six fruit trees, including pomegranate, fig, lemon, orange and grapefruit. It is tended by a dedicated group of volunteers and more are needed. The garden has served as a model for other gardens and was recently highlighted in the Texas Public Health Association (TPHA) Journal as a collaboration great among government and community. Please call to join our club or get more information.

Location	Address	Contact	Phone
Southwest MSC	6400 High Star St.	Sandra Rodriguez	281-610-5237

### West End

The West End Multi-Service Center Community Garden was established in 2009 to serve as a teaching/training site for promoting healthy eating in the West End/ Heights Community. garden has five beds and volunteers assist in planting, tending and harvesting. Located in front of Good Neighbor Clinic, the garden has produced an abundant harvest since it was established. During the

2012 Spring Fling it earned first place as garden of the year. Volunteers are needed and welcome. Please contact us for more information.

Location	Address	Contact	Phone
West End MSC	170 Heights Blvd	Sopheak Pen	713-803-1050

### Joining an HDHHS Community Garden

It's easy to join a Houston Department of Health and Human Services garden club.

Additional benefits of joining a garden club:

- 1. Gardeners are taught the fundamentals of gardening, including:
  - ➤ The different types of gardens such as container, in-ground and raised bed (which are the standard for al HDHHS gardens).
  - What type of garden is best choice for gardeners who wants to grow vegetables at home
  - The benefits of composting and organic gardening
  - Controlling garden insects naturally
  - Proper watering and nutrients in the garden
  - How to plant vegetables and fruit trees.
  - What crops grow best in Houston and when to plant them by season?
- 2. Gardeners are taught the nutritional value of certain vegetables and how they contribute to improved health, including:
  - The health benefit of the food you are planting
  - > How daily diet affects our health
  - Preparing a balanced meal
  - Preparing garden foods to get the maximum nutritional benefit from them
- 3. Gardening provides an opportunity for club members to meet new people and expand their social network. Members have an opportunity to:
  - Socialize and share growing tips, ideas and recipes with other gardeners.
  - Celebrate seasons and share seeds and plants.
- 4. Gardening is an opportunity to exercise. Members share in:
  - Planting vegetables and fruit trees
  - Monitoring vegetation-eating bugs and other harmful garden pests
  - Weeding and pruning crops
  - Watering the gardens as scheduled
  - Harvesting
  - ➤ Gardeners also have an opportunity to join other ongoing activities at the multiservice center.
- 5. Because they share in the labor, garden club members are able to add seasonal fresh vegetables to the other foods they cook.

# HDHHS Community Gardens Program Rules and Regulations

There are no fees associated with the garden clubs sponsored by HDHHS. The following rules are enforced:

- 1. Participants must register at the garden of their choice. Gardeners can be registered at only one HDHHS garden.
- 2. Active gardening reflects four seasons. Club members are required to contribute 10 hours per month to their garden. They may assist in winterization, filling the raised beds, planting, weeding, maintaining and harvesting at their garden. Club members that are physically unable to assist in gardening tasks will be assigned other duties.
- 3. Planting and harvesting times are established by HDHHS. Members are not allowed to harvest produce from the gardens at their own discretion. Garden participants that do not adhere to the harvesting schedule may be suspended from participation in the club.
- 4. The HDHHS community garden program is an organic gardening program. Use of pesticides, herbicides and insecticides made from synthetic materials as well as chemical fertilizers are not permitted. Club members may not bring their own natural fertilizers for use in HDHHS gardens except as approved by the Garden Coordinator.
- 5. Club members will share equally in each harvest. They will be notified by their garden representative when each harvest will occur.
- 6. Club members are responsible for helping keep walk and pathways clear of debris.
- 7. If a garden club member witnesses vandalism or theft, he or she will report it to the garden coordinator. At no time should a club member attempt to stop the person.
- 8. Smoking and alcohol consumption are not permitted on City of Houston property.
- Club member behavior must reflect well on HDHHS and the community. Members engaged in unacceptable behavior will be asked to leave the property and club membership will be revoked.
- 10. While input may be sought from club members, produce to be planted will be coordinated by HDHHS.

### **Building Your Own Garden**

Before planting your own garden, consider these important factors.

- 1. Where should you plant your garden?
  - Although morning sun is best, gardens should be planted so that they can get full sun during some part of the day.
  - A source for water should be close by. Watering can is done with either a hose or a watering can. Soil should always be moist, but not soggy.
- 2. How much space do you have for your garden? Gardens do not have to be very large.

➤ If you are in a second story apartment with a balcony but no yard space, then a container garden on the balcony might work for you. Containers could include flowerpots, buckets, or other chemical-free containers with drainage, capable of holding plants.

You might look at planting vegetables in existing flowerbeds. Before planting edible foods in a flowerbed be certain there are no harmful chemicals in the soil. Soil around older wooden homes may contain lead from peeling paint.

If you have yard space, are capable and don't mind digging your garden you might consider a traditional in-ground garden sized just right for you to maintain.

If you have yard space but are not sure of the condition of the soil or suspect that it might contain undesirable chemicals, or you have difficulty standing for long periods of time, then you might consider a raised-bed garden where you would bring in the soil that you need. Cinder blocks capped with pavers make an excellent bench for sitting while working in the garden.

- 3. Am I physically able to tend an in-ground garden? If the answer to that question is no, you might want to consider a raised-bed garden. The advantages of raised bed gardens include:
  - ➤ The beds are built over existing grass with a layer of paper or cardboard between the grass and the soil you will use in your garden so you don't have to dig up rocky soil.
  - Soil brought in for raised beds are less likely to have contaminants which could be filtered into the plants growing in the garden.

A two-tiered raised bed garden will allow the gardener with limited mobility to sit as needed while planting, pruning, weeding and harvesting. Another advantage of a raised-bed garden is there is less chance to overwater as excess water will escape

through the cinder block joints.

- 4. How do I get the soil ready for my garden? Whether you are planting in containers, in the ground, or in raised beds you will need to prepare the soil for your garden. Things you will need:
  - ➤ If you are planting in containers a good start will be to gather suitable containers and buy organic soil from a retail home and garden store or soil company. Most retail outlets routinely sell soil in bags that are ideal for container gardens.
  - If you are planting in the ground you will need the following things on hand to get your garden ready:
    - ✓ Digging fork
- ✓ Rake
- ✓ Mulch

- ✓ Shovel
- ✓ Compost
- ✓ Aged manure/organic fertilizer

➢ If you are planting in raised beds you will need to purchase materials including soils for planting. You will need to calculate how much soil, and how many cinder blocks and

cap stones you will need based on the number and size of the beds to you will be planting. It is more economical to buy garden soil by the yard (from a company that sells unpackaged dirt by the yard or half yard) for raised bed gardens. You choose the size and how many beds you will plant. A raised bed garden diagram follows. Things on hand should include:

- ✓ Digging fork
- ✓ Mulch
- ✓ Shovel

- ✓ Soil
- ✓ Compost
- ✓ Aged manure or Organic fertilizer

- ✓ Cinder blocks
- ✓ Capstones
- √ Newspaper or cardboard

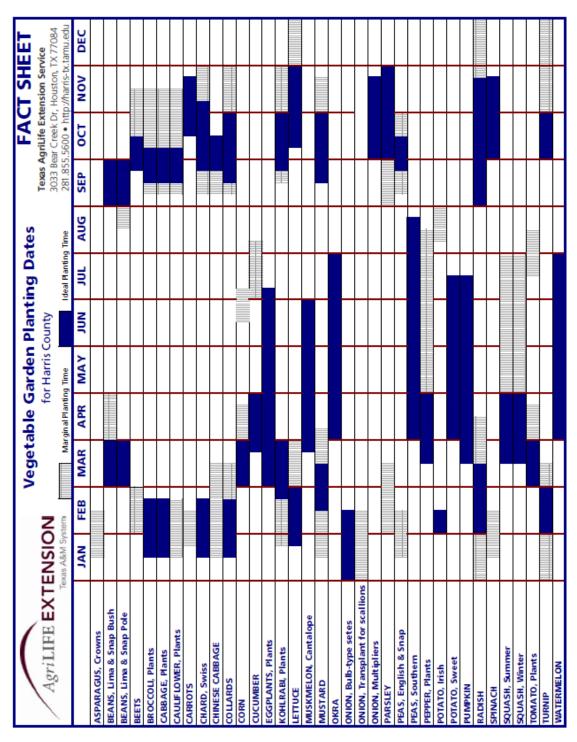

### Examples of two-tiered raised garden bed sizes and needed supplies

(Examples are based on using 8X8X16 Cinder Blocks and 2X8X16 Cap Stones)

	Bed Sizes	# Cinder Blocks	# Cap Stones	Yards of soil
	10'-8"			
5'-4"	Bed	48	24	2
	16'-0"			
5'-4"	Bed	64	32	3
	20'-0"			
5'-4"	Bed	76	36	4
	25'-4"			
5'-4"	Bed	92	46	5

### What to Plant and When to Plant It

Plant your crops by season. There are two growing seasons for our area, Fall and Spring. Use the charts below, provided by Texas AgriLife Extension Service, in deciding what to plant and in what season. Growing times are also listed.

### Typical Number of Days until Harvest

### **FACT SHEET**

### Planting Your Garden

Once your garden is prepared and you have decided what you will plant it's time to get your starter plants or seeds in the ground or containers. If you have ever soaked dry beans in water before cooking them you know that they absorb water and expand. This same soaking action is useful in helping seeds sprout more quickly. If you plan to plant on a Tuesday, soak your seeds on a Monday. Never soak the seeds for more than one day and don't let seeds that have been soaked dry out again. Things to consider when planting to help your plants grow well:

**Spacing** seeds or starter plants is very important to their future growth. They should be spaced far enough apart for them to grow without being crowded. Seeds planted too close together may be thinned later as they begin to sprout and grow into plants. 'Running' plants need more space. Always follow seed packet or plant stake instructions.

**Planting** your seed at the right depth is important as well. Seeds planted too deeply may not sprout while seeds not planted deeply enough may develop with weak root systems.

Watering your garden is essential to its growth. Check your garden daily to make sure that the soil does not dry out. The soil should be moist, not soggy. Water your garden with a hose and attachment set to shower, or from a watering can. Do not use high pressure for watering as the force of the water can damage or even destroy your plants.

Fertilizing your plants is just as important to their health as eating the right foods is to yours. Plants need the right nutrients to grow properly. A good organic fertilizer is recommended. Suggestions include compost, aged manure, fish emulsion or a reliable brand of organic fertilizer. Whichever you choose, make sure that you follow the label directions. Plants

should be fed on the day that you plant them and again every three to four weeks.

# Gardening 101 What's to Learn?

Why Garden? People who enjoy gardening do it for various reasons. While gardening has proved to be a wonderful learning laboratory for children, in many countries it is

done out necessity to provide food for the family. Some people find it while relaxing. others like to share what they grow. Whatever the reason may be, gardening is a costeffective way

save money by growing your own fruits and vegetables. The idea of growing, harvesting and consuming your own produce is not new. It has always been a meaningful alternative source to having healthy food.

### In Gardening 101 you can have your questions answered as well as learn:

- Getting the most out of your garden space
- When to plant certain vegetables
- The difference in raised beds versus conventional in-ground gardens.
- Natural control of insects and other pests.
- Identifying plant diseases.
- How and when to water.
- Spacing seeds and plants in your garden
- Identifying the best areas to plant a garden
- Container gardening
- Fruit trees that thrive in this Houston.

Gardening is a great opportunity for people of all ages to get outside and exercise while developing life skills. We hope that you find the class an enlightening and worthwhile experience. Check with your multi- service center for a class or visit us online at <a href="http://www.houstontx.gov/health/Community/gardenprogram.html">http://www.houstontx.gov/health/Community/gardenprogram.html</a>

# Your Garden's Health

### 10 Simple Gardening Tips

- 1. Never water your garden in the heat of the day, from 11am to 5pm.
- 2. Try to water your garden early in the morning, from 6am to 9am.
- 3. Water plants at the base. Stay away from watering the leaves because tap water contains chlorine, which can damage the plants leaves.
- 4. Do not over-water the garden.
- 5. Use 3 to 4 inches of mulch per bed to maintain moisture in the soil. Mulch provides nutrients and prevents weed growth.
- 6. Vegetable transplants are better suited for early evening planting during the spring and summer season when temperatures are not too hot.
- 7. Incorporate natural (organic) fertilizer and pest repellents.
- 8. Do not plant seeds too deep.
- 9. Use cages and trestles to support vegetables such as tomatoes and beans.
- 10. Keep a chart on what was planted in each bed so that crops can be rotated each year.

#### **Partnering for Success**

The Houston Department of Health and Human Services has a long history of collaborating with other agencies to collectvely address public health issues. It now brings that same spirit of collaboration to the table in addressing food security needs within the city. In addition to cultivating teaching gardens within its own properties, the department provides consultation to other organizations that wish to implement community gardens as well as those that wish to assist HDHHS in maintaining its gardens. Current and past collaborative partners include the following:

Almeda & Harvest UMC Attucks Middle School Beechnut Academy Better Busness Bureau

Blue Ridge United Methodist Church

Change Happens

Community Reentry Network
Creston Missionary Baptist
Eagle Trace Retirement Home
Fifth Ward Redevelopment Corp
Fifth Ward Enrichment Program

Finnegan Park
